EDUCATION

Birla Institute of Technology, Mesra (Tier-1 College) Ranchi
B.Tech Computer Science & Engineering , **8.1** CGPA 2021-2025
R S More College Dhanbad
Class 12th Board , State Board (JAC) 2019 - 2021

EXPERIENCE

CLEAN ELECTRIC Pune , India
Software Development Engineer 08/2025 - Present

- Developed low-latency **Server-Sent Events** (SSE) pipelines to stream high-throughput production data, keeping critical system states instantly synchronized.
- **Created Grafana dashboards and alerts** to analyze real-time production metrics , improving operational monitoring and decision-making.
- **Integrated Razorpay payment gateways and managed webhooks** for real-time payment verification to fully automate bill payment workflows .

Tech Stack: **Django , Python ,Typescript , Claude Code, Aws bedrock ,GitHub Copilot**

Software Development Engineer Intern 03/2025 - 07/2025

- Developed full-stack features by building Django backend APIs and integrating them with cross-platform (Android/Flutter)
- Created technical documentation and fixed cross-platform bugs to support the deployment of internal factory tools .

Tech Stack: **Android, Django , Python , Bitbucket , Jira**

Merge Help AI - Agentic Git Merge Conflict Resolver(Github Link)

- Designed and deployed an **agentic system** to automatically analyze, and resolve real-time GitHub PR merge conflicts
- Designed a **RAG** pipeline to index historical merge conflict resolutions, optimizing the LLM context window .
- Implemented **Multi-LLM Orchestration** using a dynamic router between **Claude and Gemini** with automated fallbacks for API failures, optimizing both system uptime and token costs.
- Enabled secure, real-time processing via **GitHub Webhooks and OAuth2.0**, leveraging **tool calling** for PR updates.

Technologies- Java, Spring Boot, Spring AI, **Google ADK**

PROJECTS

DeveloperAI – MCP Server with GitHub Integration (Github Link)

- Deployed an **MCP server** using **Spring Boot** with **GitHub OAuth2**, enabling LLMs to authenticate and access repositories .
- **Designed a PostgreSQL database** to manage user session data and organize GitHub data efficiently.
- Containerized the application with **Docker** to ensure consistent deployment across environments .
- Tech Used : **Spring Boot, OAuth2, PostgreSQL, Docker, MCP Protocol**

Assignment Help Platform(Github Link)

- A React application designed to assist students with their college assignments, featuring a Node.js and Express backend, with AWS DynamoDB for database management and AWS S3 for secure file storage
- The application includes a RESTful API for user management and efficient data handling and is deployed on AWS EC2 with CI/CD through GitHub Actions.
- Learnt Tech stack : **MERN AWS , JWT ,Google OAuth 2.0**

SKILLS

AI & Agentic Engineering	Agentic AI ,LLM, MCP, RAG, Tool Calling, Prompt Engineering , Context Engineering
Languages	Python, Java, Kotlin. , SQL, OOP, DBMS
Libraries/Frameworks	Spring Boot, Spring AI, ADK , LangChain, Node.js , Git
Tools/Platforms	Github, AWS, MongoDB ,Software Development Life Cycle(SDLC)

ACHIEVEMENTS

- Solved 800+ Problems of Data Structure and Algorithm in GFG &LeetCode.
- Top 4 in Airbus Aerothon Hackathon held at HackerEarth platform in 2024
